

# FUN ANIMAL BOOKMARK BEAR DESIGN

1. Cut out the marked box above. With the bottom right corner, fold it up to meet the opposite corner, making sure that the face remains on the outside.
2. Ensure that the face is away from you and that the long flat edge is at the bottom. Fold only the inner top corner down to meet the bottom edge.
3. Now fold both the left and right corners in so that they meet the top centre corner and then fold down the blank triangles above the faces so that they tuck behind the inner flap. You should now have a diamond shape with the face towards you.
4. You can stop at this point and use your new animal bookmark or you can cut out the ears above and stick along the top of its head, then you can cut around this to finish off your animal!
